Different centres and perspectives - valuable learning

METSCENTER, Bilthoven, The Netherlands

Course Information and Sign-up

Advanced EuSim Simulation Instructor Course

June 12-14, 2010

Bilthoven, The Netherlands

Beginning first day at 10:30 am - ending last day at 15:30 pm

Closest Airport: Amsterdam Schipol or Rotterdam Airport

Combine the course with a visit of the Annual SESAM Meeting (June 16-18) and the SESAM Pre-conference Courses (June 15). Groningen is easy to reach from Bilthoven. Visit www.sesam-web.org and www.sesam2010.eu for details on the conference.

Failure of Crisis Resource Management (CRM) is related to many adverse events. We offer practical training designed to improve your understanding and embedding of CRM in simulation courses. Our international and multi-professional faculty has extensive experience in instructor training, human factors, patient safety and CRM. The course is based on sound learning goals, relevant topics and provides hands-on practice and reflection. The course addresses experienced simulator instructors who want to develop their skill in running simulation courses that help participants reflect on their actions. Participants work in small groups in a highly stimulating learning environment. The course language is English, requiring a level that allows taking part in discussions and reflections. The course duration is 2,5 days apart from preparation and follow-up assignments.

Target Group	Experienced simulator instructors who should <ul style="list-style-type: none"> • feel comfortable running scenarios and debriefings • have led at least 25 simulation debriefings • have worked actively with simulation for at least one year
Course goals	After completing the course, participants are able to <ul style="list-style-type: none"> • identify their strengths and weaknesses in integrating CRM in simulation courses • identify influences for success and barriers to optimally help participants reflect on actions • optimize their practice in creating learning opportunities during simulation-based courses
Contents	Principles of Crisis Resource Management (CRM) and impact on patient safety Human Factors basics (memory, attention, decision-making, performance shaping factors) Active methods to bring the CRM message across Advanced scenario design Tips & Tricks for successful debriefings (avoiding and managing difficulties) Adaptation strategies for goal-oriented scenarios and debriefings Effective use of video recordings during debriefings
Methods:	Experience, practice and video-assisted feedback Theory input, case discussions, hands-on workshops Pre-course and follow-up assignments
Cost:	The course fee is 1.450.- Euros per person including lunches, soft drinks and coffee during the day, one reception and one dinner. Travelling and lodging is not included.
Further Information	Dr. Peter Dieckmann, Danish Institute for Medical Simulation (DIMS) Phone: +45 4488 3383 - mail@peter-dieckmann.de
